

## Program Description

Our program is designed for nurses who work in areas where care is provided for high-acuity patients. It will address topics related to current issues and practices in the critical care and acute care settings. The goal of the symposium is to enhance the professional nurse's knowledge base in the ever-changing world of acute care nursing. We welcome nurses from areas outside of the traditional critical care setting such as ED, PACU, DOU/Tele, and PCU.
